

# Year 5 Home Learning

This week the written piece of work is Conceptual Learning and will be completed as a poster. There is also a Maths Task to be completed online using Google Slides (no need to hand anything in).

**Due Date: Thursday 27/02/20**

## **Conceptual Learning:**

**Walt:** use research skills to create an information report on fossils

This week you will need to apply the online research skills you learnt in Computing to search information on fossils (using key words etc.). You will use this to create an information report (non chronological report). Some of ideas for your Macro/Micro Groups could include:

- What are fossils
- How are fossils formed
- How to find fossils
- Types of fossils
- Diagrams/maps etc.
- The importance of fossils
- Famous fossil discoveries

You can also decide on how to layout your report—be creative!

### The "strangest animal ever discovered": Charles Darwin

Enigmatic creature finally finds a home in the tree of life after two centuries of debate

**Macrauchenia patachonica**  
(literally "long-necked llama")

*"Imagine a camel without a hump, with feet like a slender rhino and a head shaped like a saiga antelope"*  
Professor Michael Hofreiter, University of Potsdam
